

## **PROCEDURE FOR THE PREPARATION AND EVALUATION OF THE RESEARCH PROPOSAL**

1. An applicant submitting an application for admission to doctoral studies in the science fields of Physics, Electrical and Electronics Engineering, Civil Engineering, Informatics Engineering, Measurement Engineering or Management Science is required to submit a research proposal along with the other documents specified in the 2023 Regulations of Admission to the Third Cycle Studies at Kaunas University of Technology.

2. A research proposal is prepared for each dissertation topic specified in the application.

3. The research proposal is intended for the evaluation of the applicant's theoretical knowledge of the topic to which he/she applies, the skills of critical thinking, the originality of the ideas, and the ability to formulate ideas.

4. The research proposal is prepared according to the following guidance requirements:

4.1. The volume of the research proposal is up to 6,000 characters (including spaces), i.e., approximately 2 pages;

4.2. The text is written in 12 pt., Times New Roman font, 1.5 line spacing, either in the Lithuanian, or in the English language;

4.3. A research proposal contains a summarised description of the relevance of the research proposed in the specified topic, the formulated scientific problem, the goal and objectives of the research, its significance and the expected results, the intended procedure and methodology of the planned research, the reliability of the data, the methods of obtaining and analysing the data.

5. An applicant's research proposal is submitted for the comments and the proposed evaluation (in points) by the supervisor of the dissertation topic/thematic area to which the applicant applies before the hearing of the meeting of the doctoral committee of the science field.

6. The members of the doctoral committee of the science field evaluate the applicant's research proposal while taking into consideration the comments and proposed evaluation by the supervisor of the topic/thematic area.

7. The arithmetic mean of the evaluation scores of the members of the doctoral committee of the science field conducting the research proposal evaluation is the final score for the applicant's research proposal; the mean value is rounded to the nearest whole number. The highest possible evaluation score is 10 points.
